

TRUE EFFECTS™ Hand & Skin Shield™ INDUSTRIAL

PROTECT YOUR HANDS & SKIN WITH WORLD'S MOST SERIOUS SKIN BARRIER CREAM

Industrial and commercial employees come into contact with a wide variety of chemicals and other substances that can cause severe damage and irritation to their skin, especially the hands.

TRUE EFFECTS™ Hand & Skin Shield™ can protect your from accidental splashes from chemicals used in daily industrial routines such as solvents, alkalis, acids, oils, paints, dyes and harsh cleaning products, which are all prevalent in the industry. Even though when using gloves to protect hands, the skin can still be exposed to and damaged by these harsh chemicals. This product helps guard against damage caused by constant exposure to moisture from repeated hand washing, cleaning, and wet working conditions. Furthermore, the need for frequent hand washing and use of hand sanitizers can also damage the skin, causing dry, cracked and irritated skin. Prolonged exposure to the skin using these harsh cleaners and chemicals can cause long-term skin problems for workers, resulting in lost productivity and even lost work time.
